

Surviving the supply chain crisis with technology

How software can help you forecast and maintain the right inventory levels

Come along to our FREE Webinar:

Date: Thursday, 29 September 2022

Venue: Zoom Online

Time: 10-11am (including Q&A)

RSVP: jane.hawarden@horsfield-smith.co.uk

Speakers:

Oliver Caunt | Managing Director | JCS Nuclear Solutions

Why we decided to move from manual to digital processes and how we achieved this; how technology has improved productivity, given us our time back and streamlined our stock control system

Mark Tooby | Xero Manager | Horsfield & Smith

How Xero and Flowlens can be integrated and used as a tool to streamline your manufacturing business, saving you huge amounts of time and resources

Here's what JCS Nuclear Solutions has to say:

"The impact of being able to access real time information for all employees throughout the business has been immediate" - *Oliver Caunt, MD, JCS Nuclear Solutions*

"The impact has been nothing but positive at all levels within the operation of the company" - *Oliver Caunt, MD, JCS Nuclear Solutions*

"We were operating the best part of 15 spreadsheets that we needed to touch on a regular basis and it was quite a realisation to understand that all of this was mounting up to a lot of time every week that the management at the company was demanding" - *Oliver Caunt, MD, JCS Nuclear Solutions*

"Under Horsfield & Smith's advice, we looked at more modern systems, specifically Xero, to do the accounting and bookkeeping, and that became the natural progression to look at the bolt-on for the CRM and MRP system" - *Oliver Caunt, MD, JCS Nuclear Solutions*

Here's what Horsfield & Smith Accountants has to say:

"Many manufacturing businesses are still running their finance and MRP function on ad hoc software and spreadsheets" - *Mark Tooby, Horsfield & Smith*

"Now is the ideal time to look at digital transformation to improve productivity" - *Mark Tooby, Horsfield & Smith*
